

	DESCRIPTION
 <p>23 x 38 x 38 cm</p>	<h3>ESYDOCK MAX</h3> <p>Esydock Max is the base for assembling the pumping system at the installation site quickly and conveniently. It connects to the system with four different hydraulic configuration modes and with its anti-vibration feet it maintains a high level of quiet operation.</p>
 <p>23 x 81 x 38 cm</p>	<h3>2 ESYDOCK MAX</h3> <p>This is the assembly base used to create sets of two pumps. The exceptional performance offered by the joint operation of two Esybox Max units is combined with a 50% reduction in space compared to traditional systems with the same performance.</p>
 <p>23 x 125 x 38 cm</p>	<h3>3 ESYDOCK MAX</h3> <p>Base for sets with three pumps. The modular concept is implemented in an absolutely flexible and high-performance system. Maximum results with minimum space requirements and extremely simple and easy installation.</p>

On Site Assembly means that the final product assembly process takes place directly at the installation site, rather than at the manufacturing plant. The product is, therefore, conceived right from the drawing board with all possible uses in mind.

AS FAST AS A CLICK!

Esybox Max is assembled to the base by means of a simple interlocking system, which makes installation much quicker and more intuitive when compared with traditional sets.

And in the case of multiple installation, after mounting the base and positioning the components, the pumps communicate independently via wireless.
